AI & Writing Challenge

Artificial intelligence is changing the nature and purpose of expression. It reflects back how we think, what we value, and what we're willing to outsource. This challenge asks you to explore the places in which the boundaries can and/or should overlap.

This Creative Challenge invites NEHS student members to use their own writing to examine this shift as people who are living through it.

- Create an original work (of no more than 850 words) in any form (short story, essay, creative nonfiction, or another genre of your choosing) that explores what using AI as a writing tool reveals about what it means to be a student, reader, or thinker right now.
- You must also upload a 150-word reflection of your creative choices and ethical stance.
